

apaizer releases stunningly luxurious new color – Mercury

As a continuation of apaizer's global leadership in the stone composite bathware industry and in sympathy with dominant trends for a warmer, darker sensual bathroom, apaizer releases its magnificent new color "Mercury". This tactile and organic color offers speckles of shimmer that sparkle like diamonds in the night and will create a sense of peaceful tranquility in any bathroom.

Mercury is a beautiful alternative to the standard neutral bathware color choice. It has more warmth and depth to it than white tones and can be used in those bathrooms that are in very contemporary homes matching the owner's clean lines and clutter free lifestyle exuding quality and magnificence.

apaizer™ is an Australian international bathroom designer and manufacturer specialising in hand finished, luxurious reclaimed marble stone composite bathware. Founded in 2000, the apaizer range focuses on the creation of sensuous ambience in the bathroom. Designed in Melbourne with optimum performance and durability in mind, apaizer stone bathware is manufactured using reclaimed sustainable ingredients (crushed recycled marble) and has the highest level of stone content in the market. This is a superb raw material! Its bespoke designs and diverse color palette allow for virtually unlimited choices. It is no wonder why apaizer is the bathware of choice for leading designers, hotels, resorts and residences globally.

Headquartered in Melbourne and with showrooms Australia wide, apaizer is also featured in showrooms in Europe, Asia Pacific, UK, North America, South Asia, Middle East, United Arab Emirates and Africa. apaizer offers a diverse range of luxury stone composite baths, basins, vanities and shower bases to transform the bathroom into an oasis of pure elegance, luxury and calm.
