

Sanctuary in stone

Boasting more than just good looks, this gorgeous room is a functional bathroom

Designed to be a relaxing retreat that the owners and their guests enjoy spending time in, this beautifully appointed bathroom includes a range of luxurious features including Apaiser's stunning Haven Bath.

Minimalist yet bold in appearance, the bath stands proudly on a base in front of an artfully crafted glass wall.

Made from Apaiser's very own stone composite, the bathtub makes a sublime feature statement piece in the bathroom and enhances the organic feel of the space.

Beautiful artwork, unusual objects and plants have been dotted around the bathroom to give those soaking in the bath something special to feast their eyes on.

The bathroom has been cleverly designed to bring the outside in, with the bathtub carefully positioned to overlook a lush garden. This natural theme is continued to Apaiser's beautiful Poise basin, which sits on a thick slab of black American walnut wood. Simple and sleek in design, the basin fits in with the rest of the bathroom's earthy aesthetic.
