

# Why apaiser?

- ; We are the leaders and innovators in reclaimed marble bathware
- ; apaiser is Australian owned and designed
- ; Our bathware has the highest level of stone content in the market
- ; We use reclaimed sustainable ingredients merging the inert features of crushed recycled marble with the strength of resin and the performance attributes of polymers to achieve a superior outcome
- ; apaiser is at the forefront of sustainability manufacturing bathware with low environmental impact
- ; Every piece is crafted by hand and finished by artisans resulting in a product that is more environmentally sensitive than competitive materials, and allows designers to create eco sensitive bathrooms with confidence
- ; All apaiser bathware is compliant with ISO quality management and IAPMO technical performance standards – we have an international reputation for product certification in excellence
- ; We offer unrivalled customisation and design flexibility – enabling designers and architects to create unique shapes and forms that differentiate the bathroom
- ; The unique manufacturing process allows apaiser to create sublime and fluid shapes in almost any form, with uniformity of colour, strength and integrity unachievable in natural stone. It also has the ability to be embedded with virtually any added component
- ; Our products are made with superior thermal properties and lightweight technology offering the option for installation in elevated floors
- ; We are the preferred supplier for leading luxury hotels and resorts globally e.g. Four Seasons, Hyatt, Fairmont Hotels (Raffles) just to name a few. These chains operate and own properties with extremely high design standards which typify excellence across all areas of operation, showcasing design quality and attention to detail
- ; Designed with optimum performance in mind, all our bathware is suitable indoor or outdoor and is fire retardant. It is easy to clean and is extremely low maintenance
- ; Our unique stone composite formula creates luxurious bathware that is closer to natural stone in look, feel and appeal that requires no sealing or treatment during the products life
- ; Manufactured using crushed reclaimed marble powder, resin and polymers to create a stone composite mixture, the apaiser range is unique and vastly different to CaesarStone, Quarella, Quantum Quartz or Corian
- ; Our stunning bathware range will provide timeless elegance and beauty and is assured to increase the value of your home or project

## Why stone composite marble?

- ; It is extremely stable, durable, beautiful, and easy to clean and maintain, with a diverse variety of colour and design flexibility that will suit any project. Based on an inert stone composite formula unlike other stone materials which move and crack, apaiser uses marble as its core element. The result is an environmentally sensitive material with superior performance and a sensuous organic touch

- ; Certificate of Design Excellence 2010, HA+D Awards
- ; Best New Product – Green Design 2012, Boutique Design New York
